

# KEY INFORMATION DOCUMENT

**BluOr BANK ADDITIONAL TIER 1 NOTES (AT1)** 

# **PURPOSE**

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of investing in this product and to help you compare it with other products.

#### **PRODUCT**

Product name: BluOr BANK ADDITIONAL TIER 1 NOTES (AT1 notes)

Issuer: BluOr Bank AS (hereinafter - Issuer)

This product is offered by BluOr Bank AS (6 Smilsu iela, Riga, LV-1050, Latvia).

Registration No 40003551060. Website: https://www.bluorbank.lv/

Regulator: Latvijas Banka (K. Valdemāra iela 2A, Rīga, Latvija)

This document was last updated 28.05.2025.

#### **ALERT**

You are about to purchase a product that is complex financial instrument and may be difficult to understand.

#### WHAT IS THIS PRODUCT?

#### TYPE

Notes are write-down bonds, which is a debt instrument whose nominal value can be temporarily written down if the issuer's Tier 1 capital ratio has fallen below 7%, and whose value will be restored only after the Tier 1 capital ratio returns to this level. Notes can also be converted into the Issuer's shares under certain conditions by the decision of the regulator.

The coupon is fixed and will be paid regularly, but the Issuer may decide not to pay the coupon and in such a scenario the unpaid coupon will not be accumulated.

The product does not have a maturity date (perpetual), therefore the only note redemption option for investors is if the Issuer uses the option to buy back the notes before maturity (Call Option) at any time after 5 years from the date of issue; sale on the secondary market can be used as well.

Under certain conditions, the notes may be converted into the Issuer's shares by the decision of the regulator, thus the investor's claim will be lowered and it will be subordinated to all other issuer's financial instruments (except for shares).

The notes won't be listed on the stock exchange, so they will have low liquidity, which may hinder the investor's ability to sell the notes on the secondary market.

The product may incur losses as a result of market fluctuations.

# **OBJECTIVE**

The objective of the notes is to provide the investor with an opportunity to invest in a financial instrument with a fixed yield.

# **INTENDED RETAIL (PRIVATE) INVESTOR**

This product is intended for investors who are interested in receiving regular high fixed interest income and who have no limits regarding the investment horizon. Investors must have sufficient experience in dealing with AT1 notes or have work experience in a position where knowledge of AT1 notes is required.

Investors must be able to bear the risk of losing part or all of the investment amount.

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

# **Risk indicator**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because the Issuer is not able to pay you.

We have classified this product as 6 out of 7, which is a high risk category. This means that the potential losses from using the product in the future are high. This product does not provide any kind of protection against future performance, so there is a possibility that you may lose all or part of your investment.

The Investor assumes the full credit risk of the Issuer. The notes are unsecured and subordinated and therefore the price is very sensitive to any change in market's attitude towards the Issuer and/or changes in interest rates in the debt market.

In the event of Issuer default, the investor may lose all or part of his investment and/or repayment may be delayed.

The investor may face the risk that the notes will be converted into shares. In the event of a notes conversion, the value of the shares could be lower than the conversion rate. In this case, the degree of the investor's claim will be lowered and it will be subordinated to all other creditors of the issuer (except shares).

#### RISKS

You should be aware that there are several types of risk (including but not limited to the following):

- Risks related to the Issuer (credit risk, savings policy risk, currency risk, interest rate risk, liquidity risk, country risk, operational risk, management and compliance risk).
- Risks related to notes (conversion risk, coupon risk, notes repayment risk, risk of principal, which has no maturity, early repayment risk, liquidity risk, price risk, tax risk).

The full risk description is available in the Terms of Issue.

#### **COUPON RISK**

The Issuer may decide to cancel the payment of the Coupon (in whole or in part) for an unlimited period of time and without accrual principle. Such a decision to cancel the payment of the Coupon is not a case of default (insolvency) of the Issuer, nor does it limit the Issuer's activity in any way. The cancellation of the coupon payment can have a significant negative impact on the market value of notes.

### LIQUIDITY RISK

Notes may have low liquidity, which is solely dependent on the presence of buyers and sellers in the market. Therefore, it can make it difficult for investors to sell notes in the secondary market.

#### RISK OF PRINCIPAL, WHICH HAS NO MATURITY

The notes are perpetual, therefore the principal amount does not have a set redemption date and investors can receive principal amount payments only in case of redemption of the notes by decision of the Issuer (Call Option).

## PERFORMANCE SCENARIO

The scenarios shown below illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product.

The table below calculates the amount of money you can earn back, according to different scenarios, assuming that EUR 100,000 is invested.

The calculations do not take into account the commissions you pay to your investment service provider and the costs associated with paying taxes.

PERFORMANCE SCENARIO	Holding period	Purchase price	Selling price	PROFIT/LOSS IN EUR	Results / Average annual return
FAVORABLE	1 year	100%	101%	10000*10% = 10000 EUR coupon (101%-100%)*100000=1000 EUR (Notes price change)	+ 11000 EUR (+11%)
MODERATE	1 year	100%	100%	10000*10% = 10000 EUR coupon (100%-100%)*10000 = 0 EUR (Notes price change)	+ 10000 EUR (+10%)
UNFAVORABLE	1 year	100%	98%	100000*10% = 10000 EUR coupon (98%-100%)*100000=-2000 EUR (Notes price change)	+ 8000 EUR (+8%)
Stress	1 year	100%	90%	10000*10% = 10000 EUR coupon (90%-100%)*10000=-10000 EUR (Notes price change)	0 EUR (0%)

Scenario if the Issuer decides to use the option to buy back the notes after 5 years	5 years	100%	100%	100000*10%*5 = 50000 EUR coupon (100%-100%)*10000=0 EUR (Notes price change)	+50000 EUR (+50%)
Scenario if the Issuer decides not to pay the coupon for one year and after 5 years use the option to buy back the notes	5 years	100%	100%	10000*10%*4= 40000 EUR coupon (100%-100%)*10000=0 EUR (Notes price change)	+40000 EUR (+40%)

#### WHAT HAPPENS IF BluOr BANK AS IS UNABLE TO PAY OUT?

You are exposed to the risk that in case of insolvency of BluOr Bank AS, the Issuer will not be able to fulfil its obligations arising from this product. This product is not covered by the deposit guarantee system. There is a possibility that you may lose all or part of your invested funds.

#### WHAT ARE THE COSTS?

The Product has no internal costs, however the purchase and holding of the Product may be subject to transaction fees and holding fees, the amount of which depends on the investor's investment service provider.

Before buying Notes, an investor should consider all commissions and costs. These commissions and costs reduce your profitability. The table below shows different types of costs that affect profitability if you planned to buy notes through BluOr Bank AS, assuming that EUR 100,000 has been invested. Notes are bought and sold at face value. The costs are calculated for the 1-year period of holding the notes.

Costs and charges	Description	Amount EUR	%
One-time costs	One-time commission for opening / closing investment accounts	0,00	0,00
Ongoing Costs	Commission for holding notes in the account	250,00	0,25
Transaction and operational costs	100,00	0,10	
Commission on ancillary investment Commission on preparation of analytical services		0,00	0,00
Incidental costs Commissions for the result		0,00	0,00
Total amount	350,00	0,35
