

BluOr Bank AS DISCLOSURE INFORMATION STATEMENT THE 1st HALF OF YEAR 2025

www.bluorbank.lv

BluOr Bank AS (hereinafter - the Bank) publishes this information notice, disclosing information regarding the 1st half of year 2025 in accordance with Regulation (EU) No 575/2013 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and amending Regulation (EU) No 648/2012.

For disclosure purposes regarding year 2025, the Bank uses the templates laid down in Commission Implementing Regulation (EU) 2024/3172 of 29 November 2024 laying down implementing technical standards for the application of Regulation (EU) No 575/2013 of the European Parliament and of the Council with regard to public disclosures by institutions of the information referred to in Part Eight, Titles II and III, of that Regulation, and repealing Commission Implementing Regulation (EU) 2021/637 (hereinafter – Regulation 2024/3172), and in Commission Implementing Regulation (EU) 2021/637 of 15 March 2021 laying down implementing technical standards with regard to public disclosures by institutions of the information referred to in Titles II and III of Part Eight of Regulation (EU) No 575/2013 of the European Parliament and of the Council and repealing Commission Implementing Regulation (EU) No 1423/2013, Commission Delegated Regulation (EU) 2015/1555, Commission Implementing Regulation (EU) 2016/200 and Commission Delegated Regulation (EU) 2017/2295, in which the figures are stated in thousands of euros (EUR '000) as at the end of the reporting period (30 June 2025).

Considering that the Bank does not apply the IRB approach, the internal model method, or the internal model approach for market risk in its operations, the Bank therefore does not disclose templates EU CR10, EU CCR4, EU CCR5, EU CCR7, EU CCR8, EU SEC1, EU SEC2, EU SEC3, EU SEC4, EU SEC5, EU CR6, EU CR7-A, EU CR7, EU MR2-A, EU MR3, EU MR4 at this time.

The disclosure statement is provided at the level of the prudential consolidation group (hereinafter – the Group).

Table EU LIQB on qualitative information on LCR, which complements template EU LIQ1.

Row number	Qualitative information - Free format	
a)	Explanations on the main drivers of LCR results and the evolution of the contribution of inputs to the LCR's calculation over time	The result of the LCR is facilitated by the size of the liquidity buffer consisting predominantly of balances with the Central Bank and EU central government bonds, the volume of outflows consisting predominantly of balances on current accounts and term deposits, as well as incoming cash flows from lending transactions and balances on nostro accounts. Over time, as the loan portfolio increases, the ratio may decrease, however, when new deposits are attracted, the ratio increases.
b)	Explanations on the changes in the LCR over time	When placing financing in illiquid assets, including loans, liquidity reserves decrease and, consequently, the ratio decreases. Also, during periods when some concentrated part of term deposits falls on the 30-day horizon, outgoing cash flows increase and, as a result, the ratio decreases. The increase in the ratio is facilitated by attracting financing both in term deposits and in the form of balances on current accounts.
c)	Explanations on the actual concentration of funding sources	Most of the term deposits are attracted from individuals through online deposit platforms. At the level of depositors, they are diversified; term deposits of no more than EUR 100 thousand are attracted from one individual. Concentration is formed by dependence on platforms. The rest of the term deposits mainly consists of financing attracted from various financial institutions. Current account balances are sufficiently well diversified.
d)	High-level description of the composition of the institution's liquidity buffer	The Bank's liquidity buffer as a whole consists of balances with the Central Bank and EU central government bonds.
e)	Derivative exposures and potential collateral calls	The amount of derivative transactions carried out by the Bank is not very significant, mostly they consist of the Bank transactions for hedging the currency position and transactions of the Bank's clients.
f)	Currency mismatch in the LCR	Currency mismatch in the LCR is not significant, 98% of the Bank's assets and 99% of the Bank's liabilities are denominated in EUR.
g)	Other items in the LCR calculation that are not captured in the LCR disclosure template but that the institution considers relevant for its liquidity profile	All important elements contributing to the LCR result are reflected in the LCR disclosure template.

Qualitative information on Environmental risk (in accordance with Article 449a CRR).

Row number	Qualitative information - Free format				
	Business strategy and processes				
a)	Institution's business strategy to integrate environmental factors and risks, taking into account the impact of environmental factors and risks on institution's business environment, business model, strategy and financial planning	The Bank's Council has approved the Bank's Strategy for the next three years, including the core principles of sustainability and ESG risk strategies. Based on the business model and key types of financial services, the Bank and the Group have established a Sustainability and ESG Strategy, which includes short-term, medium-term, and long-term sustainability strategic goals, objectives, and key approaches to achieve them. The foundation of the Sustainability and ESG Strategy is the operation of the Bank and all commercial entities of the Group as			
b)	Objectives, targets and limits to assess and address environmental risk in short-, medium-, and long-term, and performance assessment against these objectives, targets and limits, including forward-looking information in the design of business strategy and processes	The UN SDGs that the Bank has chosen as the foundation for its sustainable financing are as follows: 7 - Ensure access to affordable, reliable, sustainable and modern energy for all; 8 - Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all; 9 - Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation; 10 - Reduce inequality within and among countries; 11 - Make cities and human settlements inclusive, safe, resilient and sustainable;			
c)	Current investment activities and (future) investment targets towards environmental objectives and EU Taxonomy-aligned activities				
d)	Policies and procedures relating to direct and indirect engagement with new or existing counterparties on their strategies to mitigate and reduce environmental risks				
		to ensure the achievement of the sustainability goals set out in the strategy, both directly and indirectly. Before making a decision on financing any new investment or loan project, the Bank evaluates the ESG risks and the project's alignment with the Bank's Strategy.			
	Governance				
e)	Responsibilities of the management body for setting the risk framework, supervising and managing the implementation of the objectives, strategy and policies in the context of environmental risk management covering relevant transmission channels	structure regulations or in separate regulations approved by the Bank's Board. The responsibilities, main tasks, and duties of t organisational units, decision-making bodies, employees, and members of the Board in the risk management processes are outlined in the Bank's regulatory documents. The Council is the Bank's supervisory body, representing the interests of the shareholders, overseeing the activities of the Board approving the Bank's strategy, Risk Management Strategy and policies, and other relevant documents, and monitoring their			
f)	Management body's integration of short-, medium- and long-term effects of environmental factors and risks, organisational structure both within business lines and internal control functions				
g)	Integration of measures to manage environmental factors and risks in internal governance arrangements, including the role of committees, the allocation of tasks and responsibilities, and the feedback loop from risk management to the management body covering relevant transmission channels				
h)	Lines of reporting and frequency of reporting relating to environmental risk	The Financial Analysis and Financial Risk Management Department and the Chief Risk Officer regularly prepare information for the Council and the Board on ESG risk management.			
i)	Alignment of the remuneration policy with institution's environmental risk-related objectives	In its regulatory document, which defines the procedure for identifying positions that influence the risk profile and the individuals holding these positions within the Bank and the Group's commercial entities, the Bank has established the procedure and criteria			

	Risk management	
j)	Integration of short-, medium- and long-term effects of environmental factors and risks in the risk framework	The Bank has integrated ESG risk management measures into its processes, starting from the Bank's Strategy, Risk Management Strategy and policies, to procedures and methodologies, in areas where decision-making takes place and regular informing of the Bank's management about the results of achieving the objectives set out in the Bank's Strategy.
k)	Definitions, methodologies and international standards on which the environmental risk management framework is based	The Bank has conducted an ESG risk materiality assessment with the further aim of developing the most appropriate Sustainability Strategy for the Bank. The ESG risk materiality assessment conducted by the Bank included an evaluation of the Bank's own assets (investments, loan portfolio), qualitatively and quantitatively assessing the Bank's activities and geographical locations of assets (collateral) involved in exposures, as well as evaluating the Bank's general governance processes, considering the potential short-term and long-term financial impact and impact on reputation based on various criteria. By evaluating the Bank's business types and volumes, the impact of ESG risks on the risks inherent in the Bank's business activities (credit risk, liquidity risk, market risk, and operational risk) was assessed. As a result of the ESG risk materiality assessment, recommendations and tasks were compiled for more effective ESG risk management. To ensure the assessment of ESG risks before transactions are conducted, the Bank has specified in its documents the information and data that need to be collected and evaluated before making a decision, as well as the requirements for documenting the ESG risk assessment.
l)	Processes to identify, measure and monitor activities and exposures (and collateral where applicable) sensitive to environmental risks, covering relevant transmission channels	
m)	Activities, commitments and exposures contributing to mitigate environmental risks	
n)	Implementation of tools for identification, measurement and management of environmental risks	
0)	Results and outcome of the risk tools implemented and the estimated impact of environmental risk on capital and liquidity risk profile	
p)	Data availability, quality and accuracy, and efforts to improve these aspects	
q)	Description of limits to environmental risks (as drivers of prudential risks) that are set, and triggering escalation and exclusion in the case of breaching these limits	
r)	Description of the link (transmission channels) between environmental risks with credit risk, liquidity and funding risk, market risk, operational risk and reputational risk in the risk management framework	

Qualitative information on Social risk (in accordance with Article 449a CRR).

Row number	Qualitative information - Free format				
	Business strategy and processes				
a)	Adjustment of the institution's business strategy to integrate social factors and risks taking into account the impact of social risk on the institution's business environment, business model, strategy and financial planning	As a responsible business operator, the Bank has identified socially responsible measures in its strategy, ensuring an appropriate working environment, personnel development, and engagement within the Bank, as well as undertaking socially responsible initiatives for the benefit of society.			
b)	Objectives, targets and limits to assess and address social risk in short-term, medium-term and long-term, and performance assessment against these objectives, targets and limits, including forward-looking information in the design of business strategy and processes				
c)	Policies and procedures relating to direct and indirect engagement with new or existing counterparties on their strategies to mitigate and reduce socially harmful activities	Social risk factors that may be associated with the borrower (company) and its operations are assessed before making a decision on each new loan. The Bank evaluates social risk based on information provided by the client, as well as on publicly available information that may reasonably indicate factors influencing social risk. Social risk is characterised by information about the presence of social elements in the client's operations as a business operator, such as issues related to human rights, labour law compliance, employee environment and engagement, safety, sales practices, product quality and availability, and impact on society.			
	Governance				
d)	Responsibilities of the management body for setting the risk framework, supervising and managing the implementation of the objectives, strategy and policies in the context of social risk management covering counterparties' approaches to:	As a responsible business operator, the Bank has identified socially responsible measures in its strategy, ensuring an appropriate working environment, personnel development, and engagement within the Bank, as well as undertaking socially responsible initiatives for the benefit of society.			
i)	Activities towards the community and society				
ii)	Employee relationships and labour standards				
iii)	Customer protection and product responsibility				
iv)	Human rights				
e)	Integration of measures to manage social factors and risks in internal governance arrangements, including the role of committees, the allocation of tasks and responsibilities, and the feedback loop from risk management to the management body				
f)	Lines of reporting and frequency of reporting relating to social risk				
g)	Alignment of the remuneration policy in line with institution's social risk-related objectives				

	Risk management	
h)	Definitions, methodologies and international standards on which the social risk management framework is based	As a responsible business operator, the Bank has identified socially responsible measures in its strategy, ensuring an appropriate working environment, personnel development, and engagement within the Bank, as well as undertaking socially responsible initiatives for the benefit of society.
i)	Processes to identify, measure and monitor activities and exposures (and collateral wher applicable) sensitive to social risk, covering relevant transmission channels	
j)	Activities, commitments and assets contributing to mitigate social risk	
k)	Implementation of tools for identification and management of social risk	
l)	Description of setting limits to social risk and cases to trigger escalation and exclusion in the case of breaching these limits	
m)	Description of the link (transmission channels) between environmental risks with credit risk, liquidity and funding risk, market risk, operational risk and reputational risk in the risk management framework	

Qualitative information on Governance risk (in accordance with Article 449a CRR).

Row number		Qualitative information - Free format
	Governance	
a)	Institution's integration in their governance arrangements governance performance of the counterparty, including committees of the highest governance body, committees responsible for decision-making on economic, environmental, and social topics	Governance risk factors that may be related to the borrower (company), its operations, planned projects, or collateral are assessed before making a decision on each new loan. The Bank evaluates governance risk based on information provided by the client, as well as publicly available information that may reasonably indicate factors influencing governance risk. Governance risk is characterised by information regarding the presence of corporate governance process elements in the client's operations as a business operator, including an assessment of the transparency of the company's activities, its management structure, and internal control system, if implemented.
b)	Institution's accounting of the counterparty's highest governance body's role in non-financial reporting	
c)	Institution's integration in governance arrangements of the governance performance of their counterparties including:	
i)	Ethical considerations	
ii)	Strategy and risk management	
iii)	Inclusiveness	
iv)	Transparency	
v)	Management of conflict of interest	
vi)	Internal communication on critical concerns	
	Risk management	
d)	Institution's integration in risk management arrangements the governance performance of their counterparties considering:	ESG risk assessment is carried out before each decision on granting a new loan. When making a decision, positively assessed ESG risk factors, including governance risk factors, are taken into account when determining the loan conditions, such as a better interest rate, more favorable collateral-to-loan value ratio, longer repayment schedule, etc.
i)	Ethical considerations	
ii)	Strategy and risk management	
iii)	Inclusiveness	
iv)	Transparency	
v)	Management of conflict of interest	
vi)	Internal communication on critical concerns

10 Of which Level of energy efficiency (EP score in kWh/m² of collateral) estimated																		

Loans collateralised by immovable property for which energy certificates are available in the Construction Information System are listed: https://bis.gov.lv/bisp/lv/epc_documents, including those whose energy certificates and those whose energy certificate validity has expired. The energy efficiency level for those immovable properties for which energy certificates are not available in the Construction Information System will be determined once the Bank has developed an appropriate methodology for estimating the energy efficiency level of collateral, based on available data for similar types of buildings.

Banking book - Climate change transition risk: Alignment metrics.
